DETAILED ACTION

1. The amendment filed on 2/9/2007 has been fully considered and made of record.

Unless otherwise specified, all rejections under 35 U.S.C. 112 as well as any specification and/or claim objections have been overcome.

Claim Rejections - 35 USC § 112

- 2. The following is a quotation of the second paragraph of 35 U.S.C. 112:
 - The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 3. Claims 1-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In particular, claim 1 states the tapered surface is formed on "only one of outer perimetric ends" (In. 8). Claim 5 on the other hand states the tapered surface is formed on "said outer [...] perimetric ends of said rotor core." As claimed in claim 5, it would appear the tapered surface is formed on all perimetric ends, not on a single perimetric end, as claimed in claim 1. The same issue is present in claims 10 and 12.

Further, in claims 2 and 3, Ins. 4 and 5, "forming force applied" should read -forming force--. In claim 4, In. 3, "constraints" should read --constrains--. In claim 5;
"permanent-magnetic" should read --permanent-magnet--. In claim 11, In. 8, "end"
should read --ends--. Appropriate correction is required.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Application/Control Number: 10/824,408 Page 3

Art Unit: 3729

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

5. Claims 1-14 as best understood are rejected under 35 U.S.C. 103(a) as being unpatentable over Kato (US20020138968 to Kato et al.) in view of Habert (US3714484).

As discussed in the Office Action mailed on 10/04/2006, Kato discloses substantially the same invention as the Applicant. The arguments as applied in the above-mentioned Office Action apply to the claims as amended.

However, Kato does not disclose the newly added limitation of forming a tapered surface on only one of the outer perimetric ends of each magnetic pole claw.

Habert teaches forming a tapered surface on only one outer perimetric end of each pole claw, in order to reduce noise (see Figs. 4-8; see col. 2, lns. 28-46).

Therefore it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the invention of Kato, in view of the teachings of Habert, by utilizing a set of dies which create a well-defined tapered surface on one of the outer perimetric ends of each pole claw. One of ordinary skill in the art would have been motivated to do so in order to address the issue of noise.

Response to Arguments

6. Applicant's arguments with respect to claims 1-14 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

Application/Control Number: 10/824,408

Art Unit: 3729

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Livius R. Cazan whose telephone number is (571) 272-8032. The examiner can normally be reached on 8:00AM-4:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Peter Vo can be reached on (571)272-4690. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Application/Control Number: 10/824,408
